## CareMessage / Engineering

The Sanford clinic I supported served about 2,000 low-income patients. I'm interested in the point where a patient message becomes a follow-up someone at the clinic can act on.

### *H3 Clinic / Intake software*

Worked with six nurses to digitize intake and vital signs. Built edit history and read-aloud text, and helped staff learn the system during clinic operations.

### *NeuroLight / VOCO OS*

Built a platform connecting Bluetooth Low Energy and Wi-Fi devices to one computer for EEG processing trials. Dr. Anupam Kumar at Vanderbilt’s Wond’ry mentored me and uses the platform.

### *NC State Lin Lab / Computational research*

Contributed to protein-DNA binding research and developed NeuroIDEA to study TCF4 in Pitt-Hopkins syndrome. Presented NeuroIDEA at the Society for Neuroscience annual meeting.

### *Education*

Panther Creek High School, expected June 2027. Dual enrollment at Wake Technical Community College, including linear algebra and differential equations.
